Experience

City of Broken Arrow | Broken Arrow, OK

GIS Specialist | 08/2024 - Present

- Manage and maintain enterprise geospatial datasets to support city operations and internal departments
- Perform data conversion and integration across GIS, CAD, and related systems to ensure consistency and usability
- Publish and manage GIS services using ArcGIS Server with integration into ArcGIS Online and Portal
- Develop and apply Python and JavaScript scripts for automation and data processing tasks
- Troubleshoot GIS software, services, and data issues across desktop and web environments
- Support data management workflows including geodatabases, versioning, and data quality control
- Provide technical support and documentation for non-technical users and internal staff
- Coordinate with internal teams and third-party vendors to support GIS and infrastructure-related projects

Muscogee Creek Nation | Okmulgee, OK

Technical Support Analyst II | 07/2024 - 08/2024

- Diagnosed and resolved software, hardware, and system issues for end users across multiple environments
- Imaged, configured, and deployed workstations; supported user account provisioning and access management
- Assisted with Active Directory administration including account management and permissions
- Performed system testing, maintenance, and basic troubleshooting of enterprise systems
- Documented incidents, resolutions, and workflows using ticketing systems
- Collaborated with analysts and administrators to resolve escalated technical issues

Data Technician | 01/2024 - 07/2024

- Maintained and updated datasets across departments, ensuring data accuracy and consistency
- Assisted with data analysis, reporting, and basic automation workflows using GIS tools
- Supported mapping and visualization using ArcGIS Pro and ArcGIS Online
- Managed asset tracking and inventory systems with supporting documentation
- Completed IT and GIS service requests through ticketing systems
- Coordinated with internal departments and external partners on data-driven projects

GIS Technician | 07/2023 - 01/2024

- Performed data maintenance and integration from multiple departmental sources
- Maintained and compiled GIS datasets; assisted with spatial analysis and data validation
- Created web maps, StoryMaps, surveys, and web applications using ArcGIS tools
- Built internal applications using Experience Builder for tracking and reporting workflows
- Participated in project planning with GIS staff and cross-department teams
